Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 36-38, 40, 43, 45 and 46 is rejected under 35 U.S.C. 102(b) as being anticipated by Hill (US Patent 3,161,897).

The device of Hill reads on the claimed limitations including a frame (30; It should be noted the Examiner considers the area beneath element 30 as the exterior area), a fabric portion (coupled to frame via 50) positioned substantially within a portion of the exterior area (10—fig.3), at least one buoyancy (26) coupled via 30 and at least one weight (the individual 22; It should be noted that the Examiner takes the position that the fabric portion will maintain a substantially planar orientation when submerged underwater when the person 22 is seated on the fabric.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 39, 49 and 50 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hill (US Patent 3,161,897).

Art Unit: 3725

Hill teaches most of the elements of the claimed invention, except for a plurality of frame segments and a corrosion resistant frame member. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have plurality of frame segments, since it has been held that mere duplication of the essential working parts of a device involves only routine skill in the art. *St. Regis Paper Co. v. Bemis Co.*, 193 USPQ 8. It would have been obvious to one having ordinary skill in the art to make the frame member of Hill with a corrosion resistant material for the purpose of preventing wear of the apparatus.

Allowable Subject Matter

Claims 29-35 are allowed.

Claims 41, 42, 44, 47 and 48 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
